

# 10F-M

## 10 F-M, 4" High Fidelity midrange unit

*Chassis: magnesium, injection moulded, black.*

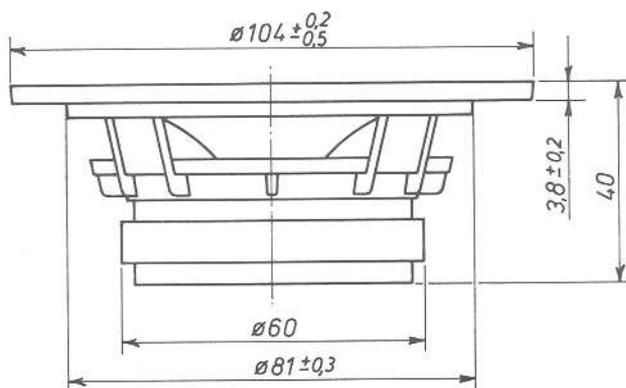

*Cone: paper, coated.*

*Dust Cap: textile, coated.*

*Mounting holes: 4 x 5 mm, equispaced on PCD 95 mm*

The performance of the 10 F-M has been optimized for the midrange frequency spectrum by treatment of the cone and corrugated surround with a special damping material. The powerful ceramic magnet yields high sensitivity and in three way systems the unit is capable of handling up to 50 W.

Cabinet design can be simplified by application of the acoustically optimized plastic enclosure available for this unit.
